

# FEATURE MATRIX

Feature	Explanation
<b>Included Look Ups-450</b>	Number of location requests included per mobile per month.
<b>Aggregated Look Ups</b>	Meaning, if you have 10 mobiles, you receive 4,500 location requests per month which can be used on any mobile. (i.e.: Additional charges only apply when you exceed 4,500 lookups across the account.)
<b>Location Functionality</b>	Allows organisations to locate devices via mobile phone tracking (GSM triangulation), GPS enabled handsets and specialised GPS devices.
<b>Job Dispatch</b>	Allows managers to allocate jobs directly from the Web interface via SMS and "Linked SMS." (Linked SMS means that upon receiving the SMS, field staff can click a link and open a mobile website. This allows for longer messages to be sent for the same cost as an SMS)
<b>Ad Hoc Unit Location</b>	Allows you to look up a handset at any time by simply selecting the units and clicking "locate."
<b>Automated Unit Location</b>	Web interface allows managers to automatic locate units and defines intervals.
<b>Points of Interest</b>	Allows users to enter an address and have it displayed on the map.
<b>Teams &amp; Groups</b>	Allows the user to create predefined mobile unit groups
<b>Two Way Messaging Integrated with Email</b>	All messaging is integrated with the managers email address, which allows reply SMS from field staff to appear onscreen as well as in your email.
<b>Integrated Click to Call Functionality</b>	Web interface allows managers to click onscreen to call a mobile unit.
<b>Geofencing</b>	Allows managers to create virtual zones.
<b>SMS/Email Alerts</b>	Alerts when someone enters/leaves a geofence via SMS and Email. These alerts can be sent to defined destinations
<b>HTTP Alerts</b>	Alerts when someone enters/leaves a geofence sent via HTTP Post
<b>View geofence history</b>	Allows managers to quickly view the history of the geofence (i.e.: People entering, leaving etc.)
<b>Routing Capability</b>	Web interface allows managers to identify the quickest route between POI's and mobile units. This route is displayed on screen and includes ETA's
<b>Advanced breadcrumb reporting</b>	Allows managers to display the past locations of a unit on screen. Provides a graphical display of the unit's location history.
<b>Custom Job Data Capture</b>	Capture unique job information via custom fields.
<b>Web Based Privacy Manager</b>	Fully web hosted and provides access to privacy settings for both managers and persons being located.
<b>SMS Based Privacy Manager</b>	Privacy management via simple SMS commands.
<b>Photo Capture</b>	Capture photos and send back to base camera phones. (available on request)
<b>Telephone Support</b>	Convenient technical support
